

DIYA MEHTA

(408) 981-7460 | diyabmehta@gmail.com | [LinkedIn - Diya Mehta](#)

EDUCATION

Chapman University, Fowler School of Engineering, Argyros School of Business

May 2026

Bachelor of Science, Data Science | Minor: Business Administration

Relevant Coursework: Applied Business Analytics, Financial Management, Financial/Managerial Accounting, Economics, Data Structures, Data Visualization, Data Science, Machine Learning, Database Management, Artificial Intelligence, Econometrics

City, University of London

January 2025 - May 2025

Study abroad program at the City University of London

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib, PyTorch, TensorFlow, Keras), Java, C++, R, SQL, Swift, HTML

Data Tools: Tableau, Power BI, Spark, Snowflake, Figma, Docker, Git, Oxylabs, Alteryx, Unity

Other: UI/UX, Excel, Google Sheets, Maze, Smartsheet

Foreign Language: Intermediate Gujarati, Intermediate Spanish (5 years)

PROFESSIONAL EXPERIENCE

Data Analyst Intern

January 2026 - March 2026

Grace & Glory Real Estate

- Gathering and cleaning data from internal systems (e.g., Guesty, Pricelabs, PMS) and external platforms (e.g., Airbnb)
- Building and automating dashboards in Tableau to track key performance indicators
- Conducting competitor analysis and market research to support dynamic pricing strategy

Equity Research Extern

December 2025 - present

Extern

- Conducting in-depth equity research on a publicly traded semiconductor company, analyzing 10-Ks, financial statements, market positioning, and macroeconomic factors to develop an investment thesis.
- Building valuation models using discounted cash flow, comparable company analysis, and precedent transactions to assess intrinsic value and support an investment recommendation.
- Drafting a professional investment memo incorporating key financial insights, valuation analysis, and risk assessment.

Data Analytics: Qualitative & Quantitative Insights Externship

June 2025 - September 2025

Extern

- Developed advanced data analysis skills by conducting qualitative and quantitative research to uncover customer insights
- Leveraged Python, data science libraries, and natural language processing tools like Gemini AI to perform data parsing, sentiment analysis, and visualize consumer feedback across multiple audio device brands.
- Synthesized insights and presented findings through a detailed data dashboard in Tableau and visual presentations.

Data Science Research Assistant

August 2024 - August 2025

Chapman University

- Extracted and cleaned 50+ years of historical data from the California Data Exchange Center and NASA using Python.
- Performed time series/statistical analyses to assess future drought frequency/intensity, including extreme event analysis.
- Built and maintained data pipelines, performed exploratory data analysis, and presented insights using Tableau.

Financial Analyst Intern

June 2024 - August 2024

Mehta & Associates

- Processed and analyzed 20+ client portfolios and presented strategic adjustments, resulting in improved risk-adjusted returns.
- Introduced an internal calendar system and enhanced the firm's website, increasing usability by 60%.
- Produced Excel-based financial models that directly affected and informed high-stakes client investment decisions.

RELEVANT PROJECTS AND EXPERIENCE

Artificial Intelligence Chatbot

Aug 2023 - May 2024

Chapman University

- Collaborated with 5 students to develop a GPT-3-powered chatbot (Python), improving class registration efficiency by ~20%.
- Engaged with industry experts in Artificial Intelligence to refine training data and improve recommendation logic.
- Delivered final project presentation to a non-technical audience, translating complex technical concepts into clear insights.

SQL Student Center

November 2025

Chapman University

- Designed normalized relational database structures and wrote SQL queries to retrieve, join, filter, and analyze structured data.
- Applied database normalization and referential integrity concepts by establishing one-to-many and many-to-many relationships using foreign key constraints and cascading updates/deletes
